Experience

Aide Business Solution (Oct 2022 - Jan 2023)

- Joined as an intern and earned a promotion to Junior Developer based on performance.
- Worked in a team on e-commerce and task management projects, building UI features using HTML, CSS, Tailwind CSS, TypeScript, and Redux.

Nujum IT (Mar 2023 - May 2023)

- Worked on a contract basis at a startup, delivering multiple small projects with a primary focus on UI development.
- Converted Figma designs into responsive, production-ready interfaces using Next.js and TypeScript.

Revelin7 Technology Pvt Ltd (Dec 2023 - Dec 2025)

- Worked for two years, starting as a Frontend Engineer using Next.js and TypeScript, and later contributing heavily to backend development with NestJS, TypeORM, Redis, and BullMQ.
- Built and maintained multiple team-based projects including Telegram bots, Telegram web apps, management systems, and backend services for a mobile application.

Skills

Frontend: HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js

Backend: Node.js, NestJS, TypeORM, Prisma ORM, MongoDB, Mongoose, Redis, BullMQ

Tools: Git, GitHub, REST APIs, Swagger, Figma

Projects

Window Seat - Travel Guide Mobile App

[Live](#)

- Built the backend for a mobile app that connects travelers with local guides to share itineraries, receive recommendations, and communicate via chat and calls.
- Designed and implemented the majority of the backend APIs using NestJS, TypeORM, Redis, and BullMQ, ensuring scalable and reliable service flow.
- Integrated GetStream for real-time chat and calling, and Razorpay for secure tip payments, collaborating closely with the mobile app developer.

Heaven Chat - Real-Time Communication Web App

[Live](#) | [Client](#) | [Server](#)

- Built a personal real-time chat application featuring Google authentication, one-to-one chat, and calling functionality.
- Designed and implemented the complete backend using NestJS, TypeORM, and Socket.IO, handling real-time events and data flow.
- Developed the frontend with Next.js and TypeScript, integrating real-time communication and managing end-to-end application flow.
